

JUNGUDO MUHAMMAD TUKUR

UI/UX Designer | Product Manager | Tech Entrepreneur

Gombe State, Nigeria | jungudo.muhammad@gmail.com | linkedin.com/in/jungudo-tukur

PROFESSIONAL SUMMARY

Entrepreneurial UI/UX designer and product lead with hands-on experience designing, building, and managing AI-powered digital products for African communities. Founder of WizzyAI (an AI learning companion for children aged 5-15), co-founder of AgriSense IoT (offline-first farm monitoring for Northern Nigeria), and lead designer for PropaBridge (a verified real estate marketplace). Skilled at translating complex social challenges into accessible, human-centred digital solutions that function in low-connectivity environments. Passionate about leveraging emerging technology to advance inclusive development across Africa.

EDUCATION

Bachelor of Science - Computer Science

2024 - Present

University of the People (UoPeople) - Online

- Studying software development, systems thinking, and data structures
- Relevant coursework: Programming Fundamentals, Introduction to Computer Science

EXPERIENCE

Founder & Product Lead

April 2026 - Present

WizzyAI - AI-Powered Learning Companion - Remote

- Conceived and built an AI-powered learning companion for African children aged 5-15, integrating six adaptive learning modes: Chat, Homework Help, Stories, Quiz, Curiosity, and Creative Writing
- Led end-to-end product development using React, Supabase, and the Claude (Anthropic) API; architected a freemium model targeting Nigerian school children
- Designed brand identity, UX flows, and frontend interface; created a full business plan and pitch materials for hackathon and incubation programme applications
- Navigated significant resource constraints to deliver a working prototype using AI-assisted no-code and low-code tools (Lovable, v0, Windsurf)

Lead UI/UX Designer

2025 - Present

PropaBridge (Zippatek) - Nigerian Real Estate Marketplace - Remote

- Led full product rebrand for a verified property listings platform serving Abuja, Kaduna, and Minna; redesigned navigation architecture, landing copy, and listing card components
- Designed and delivered an email HTML template, a 'Verified' listing badge, and a Realtor Affiliate Programme UX - all approved and implemented in Framer CMS
- Produced formal QA documentation, managed GitHub pull requests, and coordinated frontend tasks (FE-002 through FE-010) across a cross-functional team
- Conducted UX audits and contributed to the product's digital strategy and partner onboarding system

Co-Founder & Operations Lead

2025 - Present

AgriSense IoT - Offline-First Farm Monitoring - Gombe State, Nigeria

- Co-founded an environmental monitoring startup for poultry and livestock farms in Northern Nigeria, designed to operate offline-first via SMS and siren-based alerts - no smartphone required
- Selected for iHatch Cohort 5 incubation programme; developed MVP roadmap, pitch deck, team structure, and demo video materials
- Led operations including programme submissions, stakeholder communications, website build strategy, and go-to-market planning
- Oversaw branding and positioning exercises, including name and identity refinement for investor readiness

Founder

2023 - Present

KBS Creation - Gift & Decor Business - Gombe State, Nigeria

- Founded and operate a gift and decor business serving individual and corporate clients in Gombe State
- Manage end-to-end operations including product sourcing, customer engagement, social media marketing, and order fulfilment

SKILLS

Design & Product: UI/UX Design | Framer | Figma | Product Management | User Research & UX Auditing | Branding & Visual Identity | Prototyping & Wireframing

JUNGUDO MUHAMMAD TUKUR

UI/UX Designer | Product Manager | Tech Entrepreneur

Gombe State, Nigeria | jungudo.muhammad@gmail.com | linkedin.com/in/jungudo-tukur

Development & AI: React.js | Next.js | Claude API / Anthropic SDK | Supabase | GitHub | HTML / CSS | IoT Systems & Offline-First Design | No-code (Framer, Lovable, v0)
Soft Skills: Strategic Communication | Project Coordination | Startup Operations | Adaptability & Resilience | Cross-functional Teamwork | Stakeholder Engagement

ACHIEVEMENTS & RECOGNITION

- Selected for iHatch Cohort 5 incubation programme (AgriSense IoT) - one of Nigeria's competitive agri-tech accelerators
- Built and launched a functional AI-powered children's educational app (WizzyAI) as a solo founder with zero institutional funding
- Successfully led a full product rebrand for a VC-backed Nigerian real estate platform (PropaBridge/Zippatek)
